Aspen Valley Hospital's Vision is to be the leader in fostering the healthiest community in the nation. As the forerunner in nurturing a healthy community, we should be good stewards of our resources and the beautiful place where we live. Collectively, we can help improve the Pitkin County Landfill lifespan by creating better habits to reduce our impact on our landfill. If we all remember to reduce, reuse and recycle, we can produce less waste, keep our community healthy, and protect our environment.

LAST YEAR, 194 TONS OF MATERIAL PUT IN COUNTY RECYCLING WERE NOT RECYCLABLE
